— 2021-2022

## LIPLICK PIZZERIA WEB/APP - LARAVEL & VUE JS WEBAPP

It's an online ordering system through website and mobile developed by coordinating with the client and other two team members. This system was developed using Laravel, VueJs, Inertia JS, MySQL for Franchise Module and Backend, & Vue JS & GraphQL APIs for web app development.

Squirrel Delivery

— 2022

## SQUIRREL DELIVERY REACT NATIVE BOY APP

Developed this app for delivery boys of Squirrel brand with techStack of ReactNative, Restyle, Firebase Auth, Typescript, Graphql.

Floret College Of Designing

— 2021

## FLORET COLLEGE REACT NATIVE ANDROID APP

Developed this pixel perfect designed app for Floret interior design college for students and teachers to manage their syllabus, attendance, and other activities.

TechStack: ReactNative, Restyle, Firebase Auth, Typescript, Graphql.

Trans-IT Computer Institute

— 2020

## TRANS-IT CLASSES REACT NATIVE ANDROID APP

It was my second project based on React Native after ordering app, Developed with integrating Rest APIs, Using Typescript, axios and also used redux where needed.

Gained a good knowledge about react native tech in this project which gave me confidence that I can develop anything based on React Native.

## RX ENVISAGE EVENT'S WEBSITE

IPA-MSB-SF (Bombay College Of Pharmacy) organised online event which needed website for live streaming purposes. We(Team) Designed & Developed this complete website from scratch within 4 Days due to urgency of the client. It is based on Laravel and TailwindCSS and have a admin panel for CRM things.

Got to know together with team we can do big projects like this super fast with focused mind and discipline.
